

**PERMISSION TO DISTRIBUTE TRANSCRIPT DATA
THROUGH TALKBANK
Carnegie Mellon University**

Carnegie Mellon University is participating in a data-sharing program known as TalkBank that was established through federal and foundation grants. For the program to function properly, many contributors will be asked to and will give permission for their work to be made available to other researchers. With a full understanding of the aforementioned, I hereby give permission to TalkBank to make and circulate electronic copies of the language transcripts and media that I describe below. These copies may be made available to scholars and other responsible parties in accord with the specific options that I select below. I warrant that this use of the data is in accord with Human Subjects review procedures at my institution. I also warrant that there is no copyright restriction over the transcripts and media being circulated. Any further restrictions that I wish to place on the use of these data are listed under (2) below. I indemnify and render harmless Brian MacWhinney, TalkBank, and Carnegie Mellon University against any actions arising from violations of these restrictions over which they had no control, such as Internet security breeches or failures of users to abide by the stated usage policies.

1. General description of the data set and IRB # (if available):

These data include 12 monthly daylong audio recordings collected by LENA for 44 infants from Rochester, New York. Infants were aged 6-17 months during recording, and were part of a larger study including video-recordings and eyetracking session scalled 'SEEDLingS'. These data are currently under Duke's IRB Protocol entitled "Visual and Linguistic Aspects of Early Word Learning", # D0676.

The initial datashare will consist only of the files from month 6 of the recordings (n=44), with further months added as reliability and publications ensue.

2. Restrictions to be placed on data availability (check all that should apply):

Until (year) users must contact me for permission to use these data

The transcripts may be placed into open access after removal of confidential material
Elika Bergelson will stipulate whether any files can be in the 'unprotected' homebank space on a per-file basis, but the default is that it should all be in the protected space

The media may be placed into open access after removal of confidential material

The transcripts must be protected with a password

The media must be protected with a password

The media must be archived off the web

No changes to file names or contents will occur without Elika Bergelson's express written permission, and a log to clarify what changes are made and by whom (to promote accuracy and version control)

Signed  Printed Elika Bergelson Date 12/22/17
