

**PERMISSION TO DISTRIBUTE TRANSCRIPT DATA
THROUGH TALKBANK
Carnegie Mellon University**

Carnegie Mellon University is participating in a data-sharing program known as TalkBank that was established through federal and foundation grants. For the program to function properly, contributors will be asked to and will give permission for their work to be made available to other researchers. With a full understanding of the aforementioned, I hereby give permission to TalkBank to make and circulate electronic copies of the language transcripts and media that I describe below. These copies may be made available to scholars and other responsible parties in accord with the specific options that I select below. I warrant that this use of the data is in accord with Human Subjects review procedures at my institution. I also warrant that there is no copyright restriction over the transcripts and media being circulated. Any further restrictions that I wish to place on the use of these data are listed under (2) below. I indemnify and render harmless Brian MacWhinney, TalkBank, and Carnegie Mellon University against any actions arising from violations of these restrictions over which they had no control, such as Internet security breaches or failures of users to abide by the stated usage policies.

1. **General description of the data set and IRB # (if available):**

This is for Fausey Trio — password. ie, only researchers can access these files and they should never be made public/open access.

Data were collected between December 2015 and September 2017 in Eugene/Springfield, Oregon. We aimed to collect three full daylong recordings within one week for each of 35 infants ages 6-12 months old. Recordings are organized into the following subsets, noted in the Recordings Subset column: (1) Trio Full: at least 10 hours total recorded and at least 4 hours continuously recorded, for each of three days within one week; (2) Trio Else: Many families participated but did not contribute three full days. Some recordings were coded for the presence of music. These files are noted in the Recordings Music column. More information about the music project associated with this subset can be found on Open Science Framework (link to be added upon accepted manuscripts). Please note that we are sharing only recordings that parents consented to share with other researchers -- other recordings remain private, in the UO Learning Lab. Read more about projects and publications at uolearninglab.com. Please email Dr. Caitlin Fausey if you wish to work with these data and with any questions.

University of Oregon IRB Protocol #10262015.022

2. **Restrictions to be placed on data availability (check all that should apply).**

(see <http://talkbank.org/share/irb/options.html> for details and further options)

indefinite (to be updated in the future, as we work our way through manuscripts)
Until ___ (year) users must contact me for permission to use these data.

The transcripts may be placed into open access after replacing last names and addresses with pseudonyms.

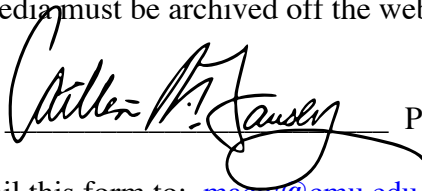

The media may be placed into open access after replacing last names and addresses with silence.

The transcripts must be protected with a password.

The media must be protected with a password.

The media must be archived off the web for offline use only.
